

You will be writing one Python program, comprised of multiple files, including python files and data files. Place all of those files into a single PyCharm Project Folder. To submit your homework, put that project folder in a single .zip file and upload it to the **HW10** dropbox.

Modify your Homework 7 – Least Squares solution to add an Exponential Fit option:

For the Exponential fit, you must use the *scipy minimize()* function to find the three coefficients of the exponential equation.
